

ACO DriveDrain®

Keeping drainage simple

ACO DriveDrain®

Following the success of ACO DriveDrain®, and to reflect the requirements of ACO's customers, ACO Build are delighted to release ACO DriveDrain® with a black channel and a choice of a black plastic or galvanised steel grating

The channel is produced from black foamed PVC-U, giving you an immensely strong, lightweight channel.

The friction-fit gratings are load-tested for all domestic applications and eliminate the need for fixing clips, which can break or work loose

Available in 1 and 3 metre lengths, black ACO DriveDrain® is supported with a full range of accessories, including corner units, connection pieces, vertical outlets and sumps; giving you the most versatile plastic channel on the market.

Developed from over 50 years' experience, and using the most advanced manufacturing techniques and materials; ACO DriveDrain® is the Professional Builders' choice.

Ask for ACO - accept no compromise.

Why choose ACO DriveDrain®?

- ▶ **Easy and quick to install**
- ▶ **Tough - before and after installation**
- ▶ **Infinitely variable outlet position**
- ▶ **Rapid-fix boltless grating eliminates fragile fixing clips**
- ▶ **Easily cut to any length - no power tools required**
- ▶ **Full set of accessories for a professional installation**
- ▶ **Available in 1m and 3m lengths**
- ▶ **Ideal for pedestrian and light vehicle traffic**
